Business **Project management, Training, Team leadership, ITIL change management**

EXPERIENCE

Computer ConQuest, Leicester — Senior Technical Consultant

March 2010 - PRESENT

With CCQ I've been responsible for the creation of **web based and mobile applications** for a number of startups and existing organisations. I've worked with a variety of stacks including NodeJS, **C# Web Api**, Python, and **AngularJS**. My work has had a heavy focus on **mobile first**, progressive feature, design for web applications.

Recent projects include a **C#/Angular** based business social network, a **Node/Angular** based crowd-sourced fashion data collection network and a real-time resource booking service with **html5** (WebRTC) based video interviews.

I've worked closely with designers to create **responsive** web applications designed to work as well on mobiles as they do on desktop devices. I have utilised **progressive feature enhancement** to ensure the right functionality and interface are made available for a wide variety of devices.

I've also worked on a number of Windows applications for the Engineering and Finance sectors. These utilised **C#** and **WPF** to provide simple interfaces to complex life cycle and liquidity calculations.

IMPORTANT NOTES

I hold British Citizenship and a full UK driving license.

PRIMARY SKILLS

C# 8 years

Angular 4 years

Project Management 9 years

WebAPI 6 years

Recent Projects

iTroduce - A web-based business networking tool. (ASP/WebApi/Angular)
